No other system is more comprehensive and beneficial for complete transparency in real time with your labor force than PET Tiger.

The versatility of the PET Tiger system has contributed to our unprecedented growth across the commodity spectrum. From grapes to berries, orchards to nurseries, the PET system brings value to growers, shippers, packers and labor contractors alike, both nationwide and internationally. The ability to see production data in real time and the flexibility to control and share that data with the right people at the right time will absolutely transform your operational efficiency.

PET works great for all sizes of operations from the "mom and pop" to corporate giants. Orange Enterprises works with the customer to tailor the software to their specific needs. Providing a system for all areas include equipment maintenance, tracking and usage, work order generation and completion. It is all up to the user and what they want to accomplish with the system.

PET Tiger incorporates all types of collections devices using barcodes, RFID, NPC and GPS, including Bio identification in the field! Clock-in with a snap of a face, Yes-biometrics in the field. Our versatile mobile PET Tiger app tracks hours, pieces, equipment, locations and activities. Just snap a photo at clock-time to approve identity. Regardless of geography PET Tiger users can maintain one database for all of their employees' time and piece data.

With the scarcity of today's labor force, its increasing costs, as well as the swelling

regulations, many farming operations are implementing PET Tiger to more efficiently manage it all.

Labor tracking in the field, cold storage, packing house or administration is essential to managing your operation. As many organizations, nationwide are experiencing on a daily basis, PET Tiger captures

Orange Enterprises Inc Fresno, Oakland, CA (559) 229-2195 (800) 656-7264 www.TigerJill.com time and attendance data for workers and assigns specific jobs to individual workers and crews using an iPhone or Android device as well as biometrics if needed.

Taking that further still, the PET system can provide you real time production data in auto generated reports, emails and present that information in real-time on large screen displays, your computer or smart devices.

Let PET Pocket watch your wallet - manage H2A workers and join the club of the innovative real time PET TIGER System to manage your labor, equipment and productivity with integration to your existing business applications.

Imagine seeing field production as it is

happening and displaying that information in the sales, marketing and receiving areas! By electronically collecting the labor data, you'll greatly reduce the administrative time confirming the data is accurate and since the PET system integrates with Accounting and Payroll, it eliminates the time consuming, manual entry process.

Using the PET system to enforce breaks, lunches and other mandated requirements, means your labor contractor and yourself are in complete compliance with local, state, federal and union mandated requirements.

Orange Enterprises, Inc. with over 30 years of experience integrating software, computers, and system, incorporates the newest mobile and biometric technology into today's payroll accounting and logistics giving its user a seamless, paperless and wireless labor tracking solution.

Orange Enterprises, Inc. provides onsite and remote installation and training. Our support staff works closely with each user to insure they have addressed all the uniqueness of each operation.
